24V RGBW COB LED Strip - 896 LED/m, 12mm, 20W/m

RGBW COB LED strip combining RGB and a selected white-light option, with 24 V DC input, 896 LED/m and a 12 mm PCB. Confirm a compatible RGBW controller and power supply.

Model	YT-COB-896-RGBW-24V-12MM-A1
Input voltage	24 V DC
Nominal power	20 W/m; 100 W per 5 m roll
LED density	896 LED/m
PCB width	12 mm
Cut interval	31.25mm
Light / color options	RGB+White
CCT options	RGB+3000K/4000K/6000K
Published CRI	Ra>90
Published efficacy	80-90lm/W
Dimensions	L5000xW12mm
PCB color options	White
Standard reel	5 m

Project and installation confirmation

Published specifications describe the listed options. Confirm the selected CCT/CRI, light-output data, protection, maximum run, power feeds, thermal conditions and controller compatibility with the quotation. Request the matching technical reports and applicable product documents for the selected configuration.

Ordering: Standard LED strips normally start at 5 m. Standard production is usually about 10 days; custom sampling about 10 days; custom production about 15 days after payment and specification confirmation. Eligible confirmed rush orders can dispatch as fast as within 3 days after ordering. Transport time is additional.

Warranty: LED strips, including custom strips: 5 years. Confirm operating conditions and written warranty terms when ordering.

Request this model: quantity, destination and required date
